

FUN STOP

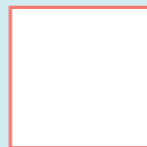

WINTER OR SUMMER SNOWFLAKES

Under Heavenly Father's direction, Jesus Christ created the earth and all things in it—including snow. In some places in the world, like parts of South Africa, Argentina, Australia, and Chile, July means snow. And even if it's hot and sunny where you live, you can still make a snowflake!

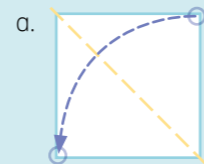

You can make up your own design, or choose to follow one of these patterns!

1. Start with a **square** piece of paper.

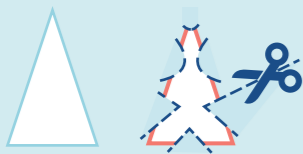

2. Fold the square in half to form a triangle, and then in half again.

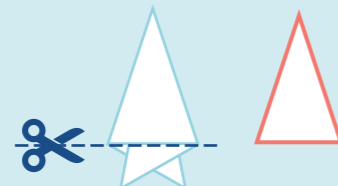

6. Unfold the paper to reveal your snowflake!

5. Keeping the paper folded, cut out a design of your choice.

4. Cut off the pointed edges at the top.

3. Fold the triangle in thirds.

GOOD NEWS MAZE

Christ is risen, and now it's your turn to share the good news with as many people as possible. Pass by every person in the streets of Jerusalem on your way out of the city without backtracking.
